

Mu Editor - New User Cheat Sheet - Python

1. Select Python 3 Mode

Mode

If you chose the wrong mode when the editor started, use the Mode button to change it

Python 3
Create code using standard Python 3.

You can see what Mode the editor is in at the bottom right of the window

Python 

2. Create, Load and Save Files

New

Load

Save

Simply use the **New**, **Load** and **Save** buttons

loop_examples.py * X

To **Rename / Save As** simply double click the filename in the tab (or **Ctrl-Shift-S**)

Mu auto saves every 5 seconds

* by the filename means the file has been updated and not saved

4. Run your code

Press **Run** or **F5** to execute the program

5. Debug your code

Press **Debug** or **F6** to start the
