

CLUE nRF52 PINOUT

- Any GPIO pin can be configured as a PWM pin
- Any GPIO Pin supports interrupts

- Warning:** ABSOLUTE MAX per pin 10mA
5mA Recommended
- Warning:** ABSOLUTE MAX 30mA for the entire package
- 3V3:** 3v3 output from regulator
ABSOLUTE MAX 400mA
- VBAT:** 3v - 6V

Digital pin, can be referenced using "board.D#" or "board.P#"

4 A6 Digital or analog pin. can be referenced using "board.D#", "board.P#", or "board.A#"

i On-Board sensors can be accessed using "adafruit_clue" library

17 LED
i Can also be referenced using "board.L"

18 NEOPX
i Can also be referenced using "board.NEOPixel"
