How to create an Adafruit account

The best way to shop with Adafruit is to create an account which allows you to shop faster, track the status of your current orders, review your previous orders and take advantage of our other member benefits.

The screenshot shows a user interface with two main sections: "SIGN IN" and "ORDER STATUS".

- SIGN IN:** Includes a success message "Signed out successfully.", a text input for "EMAIL OR USERNAME" containing "test123@adafruit.com", a text input for "PASSWORD" with masked characters, a "SIGN IN" button, and a "NEED AN ADAFRUIT ACCOUNT?" section with a "SIGN UP" button.
- ORDER STATUS:** Includes a question "Did you check out as a guest? Or do you just want to check your order status without signing in?", a text input for "EMAIL ADDRESS", a text input for "ORDER NUMBER" with a link "Where do I find this?", and a "CHECK ORDER STATUS" button.

If you already had an Adafruit account, this is the page where you would enter your email, username, and password. Since you are creating an Adafruit account for the first time, you can click the "Sign up" button below "Need an Adafruit account?"

The screenshot shows the "SIGN UP" form with the Adafruit logo at the top left.

- SIGN UP:** Includes a descriptive paragraph: "The best way to shop with Adafruit is to create an account which allows you to shop faster, track the status of your current orders, review your previous orders and take advantage of our other member benefits."
- Form Fields:** "FIRST NAME", "LAST NAME", "EMAIL", "USERNAME", and "PASSWORD".
- Username Note:** "Username is viewable to the public on the forums, Adafruit IO, and elsewhere."
- Button:** "CREATE ACCOUNT".

Simply fill out the form and click create account.
