Code Details

We've ended our 2FA coupon code promotion, it ended December 2020. We still strongly recommend 2FA setup for your account to keep it safe even if your password is compromised!

Adafruit is currently offering a one-time use discount code of 20% off

The code is **SECURED**

Some restrictions apply, including product-level restrictions (a handful of products, including most Raspberry Pi boards, will not be eligible for discount). The discount does not apply to subscriptions or gift certificates either. The code is active from now until December 20th 2020 -- so get shopping!

This guide will show you how to secure your Adafruit account and, once secured, how to apply the discount to your order.

Secure your Adafruit account

We've ended our 2FA coupon code promotion, it ended December 2020. We still strongly recommend 2FA setup for your account to keep it safe even if your password is compromised!

Securing your Adafruit account is a two-part process. First, you will need to verify your email address. Then, you will need to set up 2FA. Follow the steps below to secure your account.

Don't have an Adafruit account? Create one! The offer is only available to account holders

If you don't have an Adafruit account, you should start there.

Create one now at adafruit.com.

[We have a guide to help you through the process. \(https://adafru.it/FJ6\)](https://adafru.it/FJ6)

Once you have your account set up, it's time to verify your email address. First, log in to your account and click on the **My Account** section. Next, click on the **Gift Certificates and Coupons** option.

My Account

[Profile](#)

[Addresses](#)

[Security & Privacy](#)

[Payment Methods](#)

[Subscriptions](#)

[Order History](#)

[My Wishlists](#)

Gift Certificates and Coupons

[Product Notifications](#)

[Newsletter Settings](#)

[Change Password](#)

[Learning System](#)

Once there, you'll see the SECURED coupon listed under Account Coupons, and you'll see our prompt to verify your email and set up 2FA.

Account Coupons

Coupon Code	Description	Amount	Expires
SECURED	20% off for securing your account. To use, verify your email, enable two-factor authentication, use the coupon on check out. To redeem this coupon please verify your account email . To redeem this coupon please enable two-factor authentication for your account .	20%	2020-11-27

Click the **verify your email** hyperlinked text. You will need to check your inbox for an email from Adafruit and follow the prompts.

You can verify your Adafruit account email address by clicking the link below:

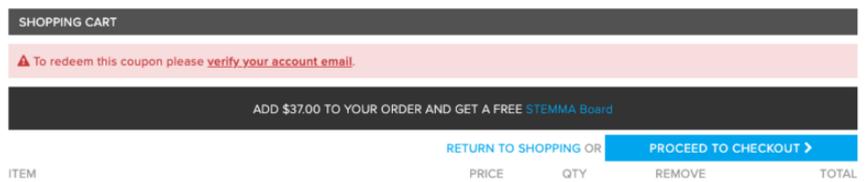

[Verify My Account](#)

After you verify your account, log out of your account and log back in. Then navigate back to the **Gift Certificates and Coupons** tab under the **My Account** section. You'll see that the prompt under the Account Coupons section has been updated. Congratulations! Your email has been verified. Now all you need to do is set up 2FA.

Your adafruit account was successfully verified.

Please note, if you try to use the code during checkout without verifying your email, you will receive an error message.

Next, return to the Account Coupons section of your **Gift Certificate and Coupons** account details and click the link to enable 2FA on your account.

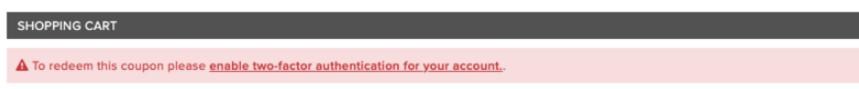

Two-factor authentication is a 2 step process to help keep bad guys out of a computer account even if they have your password. For shorthand in this tutorial, Two-Factor Authentication will be referred to as 2FA.

Please follow the prompts to set it up. [We also have a detailed guide here about why 2FA is important and how you can enable it. \(https://adafru.it/G0e\)](https://adafru.it/G0e)

Please note the option to use SMS is no longer available. Please set up 2FA with Authy or the Google Authenticator App

If you try to use the discount code before 2FA is enabled, you will receive the following error message:

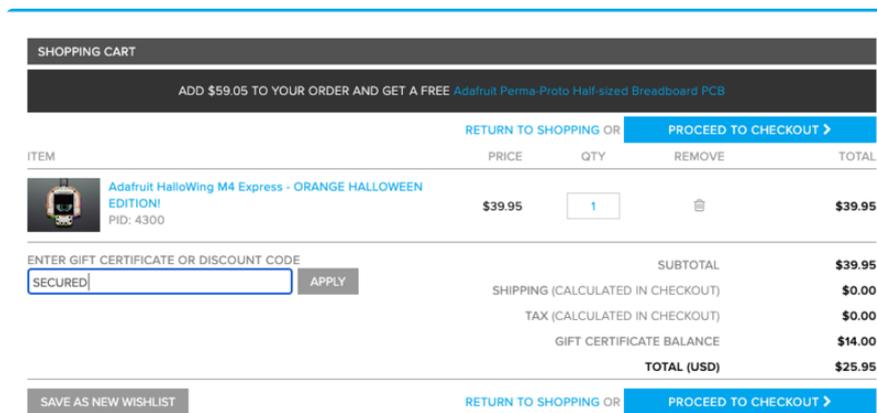

Once 2FA is enabled, please log out of your account and then log back in. That's it! You've **SECURED** your Adafruit account, and you are officially ready to use that discount.

How to Use the Code

We've ended our 2FA coupon code promotion, it ended December 2020. We still strongly recommend 2FA setup for your account to keep it safe even if your password is compromised!

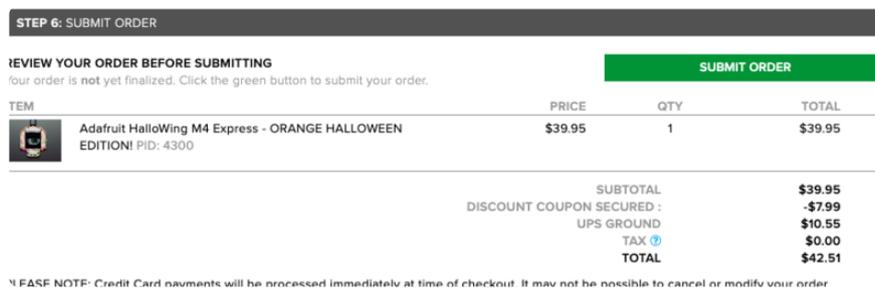

Now that you've secured your account, you are ready to shop!

Please add items to your cart and then click on the shopping cart icon.

While viewing your shopping cart, you'll be prompted to enter the code on the left side of the screen, under the list of your items.

Please type the code **SECURED** there and click Apply.

The 20% discount is not applicable to subscriptions, gift certificates or individual Raspberry Pi computers

Check the order calculations to make sure the 20% discount has been applied. Then, proceed through checkout as normal!

You will also see a message at the top of your Shopping Cart confirming that the code has been applied. Congrats! You've secured your account, and secured some savings (wink).
